## 6" Fire Hydrant

### Locally manufactured

#### **FIRE PROTECTION:**

*The 6" ISS hydrant* was designed and built to provide unsurpassed fire protection. Utilizing computer-developed data, ISS engineers painstakingly sculpted interior surfaces to provide the smoothest possible waterway, resulting in the lowest possible loss of head through the hydrant.

The result? More water to the nozzles faster. With the ISS Hydrant, it's performance that counts.

#### **MAINTENANCE:**

Extraordinary steps are taken in both the design and manufacturing process to ensure that the ISS Hydrant can be routinely serviced and repaired easily. All working parts are readily accessible from the top of the hydrant and are built from the highest-quality materials.

#### **Hydrant check valve:**

The hydrant check valve prevents reverse flow through the fire hydrant, safely protecting our drinking water while providing a full-port unobstructed waterway that allows firefighters access to the water they need when they need it.

## **Model: EGY-FH6**

6" fire hydrant complete with:  
2 x 2 1/2" outlet fire hose valve  
With B.S. instantenous coupling,caps  
And chain.
