VERTICAL AND HORIZONTAL BLADDER TANKS EGY-CVBT/CHBT

The ISS Bladder Tank is one component in a balanced pressure foam proportioning system. It requires no external power, other than the water pressure to ensure correct operation. The bladder tanks are designed and constructed in accordance with the latest revisions of the ASME codes or optionally as per the European Community's pressure equipment directive (PED) and carry the CE marking with a working pressure of 175 psi (12 bar) and tested to 228 psi (15.7 bar) pressure.

SPECIFICATIONS

The tank shell is constructed of Carbon steel, The circumferential, as well as the longitudinal body seam, are machine welded. The tank interior welds and edges are ground smooth.

The tank shell water inlet and tank shell water drain is screened to prevent bladder blow out or the entrapment of debris between the tank shell and the bladder.

The horizontal tank assembly is supported on two saddles welded to the tank and fitted with anchoring holes allowing easy access to the bladder drain/fill valve and the tank shell drain/fill valve.

FEATURES

- UL listed .
- ASME - the AMERICAN SOCIETY OF MECHANICAL ENGINEERS.
- Option CE mark – constructed in accordance to EN 13445-2/3/4/5
- The bladder is manufactured of a vinyl based polymer.

Bladder material shall have an ASTM

D-412 Tensile Strength of at least 3000 psi and an ASTM D-624 Graves Tear Strength of at least 420 lbs./in.

- Tanks are supplied with foam concentrate discharge located at the top of the tank.
- Standard piping (vents and drains) material for non-prepiped tanks is stainless steel.
- All valves are labeled showing normal working position and function.
- Lifting lugs are permanently welded to the tank with eyes of approximately 2" diameter.
- Tanks contain a perforated PVC center tube that assures maximum agent discharge.
- All tanks are oversized to allow for any thermal expansion of the foam concentrate.
- All tanks are supplied with a label, which identifies the type of foam concentrate the system is designed for, the percentage ratio and the tank size.
- Tanks are painted red enamel.

OPTIONS

- Sight Glass.
- Red epoxy finish.
- Custom fabrication of specialty materials, dimensions, and capacities.
- Actuated valves for water/concentrate.
